

To Whom it may concern at the FCC:

I need to let you know that I benefit greatly from listening to XM Satellite Radio and its traffic and weather channels. XM in particular and satellite radio in general provides variety and quality that are not available from the local radio broadcasters. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

The NAB has tried in the past to quash every new technology that has come along. This a bold-faced attempt to protect their own revenue streams without any regard to try to improve their product and compete on a level playing field.

Please do not bow to the deep pockets and persuasive lobbyists of the NAB. Listen to the people. The REAL people.
